The QPrint Thermal4 WiFi is the latest model of compact and universal usable thermal printers of the type QPrint. With its built-in WiFi interface this energy-saving thermal printer can be integrated in all existing installations without additional costs and delays. The possibility to use this thermal printer regardless of the POS system's location is its outstanding characteristic for use as a kitchen printer in demanding work environments. Especially as a receipt printer in combination with mobile ordering systems such as QOrder the QPrint Thermal4 WiFi can prove its flexibility and optimize your daily workflow.
